

BOILER AND FURNACE THERMOCOUPLE

WITH EXPANSION LOOP SQUARE TYPE TIP TS51 – TYPE WI

FEATURES		TECHNICAL SPECIFICATIONS								
<p>High quality thermocouple element with MgO mineral insulated metal sheathed cable, providing excellent stability and reproducibility. The correct choice of sheath material will strongly influence the stability and the life time of the thermocouples.</p> <p>The unique properties make this basic element ideally suited for a wide variety of applications up to 1200°C depending on thermocouple type and metal sheath.</p> <p>The thermocouple element is fully bendable.</p>		<ul style="list-style-type: none"> Max. temperature depending on thermocouple type and metal sheath Minimum R_{ins} : 1000 MΩ at 500 VDC, ambient Standard accuracy IEC 584 class 1 Connection wire: ANSI / IEC / DIN With special tip for welding on process pipes 								
<p>Thermocouple types</p> <p style="text-align: center;">K / N</p> <p>According to IEC 584</p>		<div style="text-align: center;">  </div>								
ORDERING INFORMATION										
TC	K	K	K	K	N	N				
	NiCr – NiAl	NiCr – NiAl	NiCr – NiAl	NiCr – CuNi	NiCrSi – NiSi	NiCrSi – NiSi				
Sheath	M2110	M0601	M0809	M0001	M0809	M0001				
	AISI – 310	Inconel 600	Hastelloy X	HR160	Hastelloy X	HR160				
Diameter	3	3.2 1/8"	4.5	4.8	6	6.35 1/4"	8	9.53 3/8"	12.7 1/2"	Other on request
Hot junction	Individual isolated (I)		Common isolated (CI)							
	Hot junction electrically isolated from and shielded by the sheath		Multiple hot junctions joined to one hot junction electrically isolated from and shielded by the sheath							
Colour Code	ANSI		IEC		DIN					
	ANSI – MC96-1		IEC 584-1		DIN 43714					
Wire	M00		M01		M02		M03		OPTIONS Overall stainless steel braiding	
	PVC		Teflon [®]		Kapton [®]		Glass fiber			
	polyvinyl		extruded FEP		polyimide tape		resin impregnation			
	max. +105°C		max. +260°C		-80° +360°C		max. +480°C			
Transition	Stainless steel. Same diameter as Mi cable for OD >4.8 mm . Otherwise OD9.53 mm									Other on request
	Standard potting compound: max. 120°C									

Weld on type											
Specification								-standard length 40 mm -standard : 12x12 mm -Material : same as thermocouple -option : other dimensions

Options

Code	Description	
KK	Adjustable compression fitting	Please indicate process thread
PR	Protection sleeve	Refrex® 1200 Braiding sleeving Alumina-Boria-Silica fiber retains strength and flexibility at continuous temperature up to 1100°C Refrex® 1400 Braiding sleeving Alumina-Boria-Silica fiber retains strength and flexibility at continuous temperature up to 1371°C Other on request
WC#	Welding clip + number	Same material as thermocouple sheath
CON	STD	No connection head
	S10/S16-N110-E407	Alu head hinged / Alu screwed type with nipple union nipple
	S20/S26-N110-E407	Alu head hinged / Alu screwed type with nipple lock nut
	XXX	Other on request
CF	Adjustable compression fitting	Mounted in union / nipple
PSH	Pre shaping of thermocouple	Specify the requested form
	SDL / SDR	Side entry down left / down right
	SUL / SUR	Side entry up left / up right
	BDL / BDR	Bottom entry down left / down right
	TUL / TUR	Top entry up left / up right
HC	Heath shield	Standard material SS310 . Other on request
